DISABILITY INSURANCE AWARENESS MONTH

May 2016

INCOME PROTECTION

Nobody is impervious to a disability. They strike without prejudice or warning. Your ability to earn an income is likely your most valuable – and vulnerable – asset. The following graph is data from a top U.S. law firm. Even with premiere group DI benefits, 48% of the partners were underinsured. Some of the partners had less the 40% income protection. May is Disability Insurance Awareness Month and now is the time to consider what your earning potential is. Then determine whether or not you think it's worth protecting more of it.

Review your income protection portfolio this May to make sure you are financially protected from an unexpected illness or accident.
